Dr. T. Thyagarajan
Professor & Director

Ref: AU/CUIC/TNSLPP/2018-19

Date: 23.11.2018

To

The Deans of University Colleges & Principals of Affiliated Engineering Colleges
Madurai Zone

Esteemed Professors,

**Sub: AU – CUIC – TNSLPP Drive – 2018-19 – Madurai Zone (M/s Infosys Limited) –
CHANGE OF DATES**

Anna University, Chennai is organizing "Tamil Nadu State Level Placement Programme" (TNSLPP) 2018-19, for the Present Final Year (2019 Passing Out) Students studying in University Colleges and Affiliated Engineering Colleges of Anna University, Tamil Nadu under Madurai Zone.

M/s Infosys Limited has kindly agreed to participate in this TNSLPP drive. As per the direction of our esteemed Vice-Chancellor, the Centre for University - Industry Collaboration (CUIC), Anna University, Chennai is conducting this programme with below mentioned rescheduled dates:

Date	Company	Eligible Branch	Eligibility Criteria	Process	Venue
27 th & 28 th Dec. 2018	M/s Infosys	B.E / B.Tech (All Branches) / M.E / M.Tech (All Branches) / MCA / MSc (Computer Science / Information Technology)	<ul style="list-style-type: none">• Minimum 65.00% from 10th onwards• CGPA 6.50 and above (no rounding off)• No Standing Arrears	Online Test, Technical & HR Interview	K.L.N. College of Engineering Route 47 C, Sivagangai District Pottapalayam – 630 612

The Dean / Principal / Placement Officer may collect the Registration Fee of Rs.750/- from each student and make ONE CONSOLIDATED DEMAND DRAFT of the total amount to ease our accounting purposes and submit the hard copy of the registration form (Annexure-I) along with the Consolidated Demand Draft to the CUIC Staff Members camped at respective venue on 27.12.2018 at 7.30 a.m. at the time of Registration.

YOUR COOPERATION IN THE SUCCESSFUL CONDUCT OF TNSLPP IS VERY PRECIOUS.

Thanking you.

DIRECTOR, CUIC

From,

27.11.2018

27/11/18

Sub.: Seeking Permission to sanction the amount for Infosys off Campus Recruitment
@ KLN Engineering college, Madurai -reg.

Our students were found eligible to attend the **Infosys off Campus recruitment drive, Anna University Madurai zone (TNSLPP)** to be held on 27.12.2018 and 28.12.2018 at K.L.N College of Engineering, Madurai. I request you to permit these students to go and attend the off campus recruitment. An amount of Rs.750/- has to be paid for each student as one time registration fee and I request you sir, to sanction the amount of **Rs 21750/-** for 29 students. We have to submit a single Demand Draft for this on the day of recruitment in favor of "The Director, CUIC, Anna University" payable at Chennai. We seek your kind approval for the same.

Thank you

Enclosure:

1. Eligible Students List

Yours sincerely

R.Sornalatha

TRAINING AND PLACEMENT CELL

bigElogicTechnologies

Design your future with us...

bigElogic technologies is a Chennai based leading solution provider for Windows, Web, Mobile and Electronics based applications. Established in 2006, the company has been promoted by some highly experienced professionals dedicated to provide total IT solutions under one roof. It possesses not only the latest technology gadgets but also the most knowledgeable and experienced hands to offer most user friendly customized solutions. We are a product company focusing on innovating products to help solve real world problems. Our interest spans over and not limited to web, desktop applications, data mining, machine learning, artificial intelligence, Internet of Things, Cloud computing. The technologies we expertise in are ASP.NET, SQL server, MEAN stack, Android, Python, Flask, NLTK, AWS, Tensorflow, Hadoop, MATLAB, Xilinx, Google SDK and so on. Apart from the product development, we are into Research, Consultancy in research and product development, training and placement activities.

Major products

- Content Management System using ASP.NET MVC 4/SQL Server for **Iraq Governor office.**
- XRF Reporting Tool using C# and SQL Server/MS Access Generic Version for **Fischer Measurements India Pvt Ltd (Pune).**
- Job Website Portal using MEAN stack (Mongo DB, Express JS, Angular JS and Node JS) for a leading **pharmaceutical company in US.**

Other products

- Photo Studio Management Studio
- Fire Works Management Studio
- Account Software
- Customized Offline Bulk SMS
- Gold Exchange Management
- XRF Reporting Tool
- Acid Test Maintainer
- Silver Exchange Management
- Account Management Studio
- School Offline Management Studio
- Grocery Shop Management Studio
- Payments API
- AI Chatbot with IoT

We are doing research to build products to solve problems of learning community, society and to revolutionize commercial markets.

- Virtual Teacher – This started as we find students difficult to learn new technologies at their own pace and to assist individually. We are employing neural networks to understand the user, customize content, track progress and uses feedback mechanism.
- Now Connect – This began with the idea of providing information and interacting with people in public or commercial areas to know what's happening around them. Suppose you are in a supermarket and searching for an item, this will help you locating product, information about product, provide feedback. In case of airports, this will let you know of the details and local info updated lively for easy access without relying on the information boards and query instantly.
- Safe Ride – Accidents are catastrophic and we are working on pattern recognition and unlocking to analyze the mental condition of the driver and ensure he is fit to ride mentally which prevents to ride under influence of alcohol, high mental stress, emotional imbalances.
- Cognitive Radio – The design of CR antenna is being carried out, using ANSYS HFSS. CR networks can be implemented using overlay or underlay mode. In underlay mode an ultra-wide band antenna can be used to transmit with very low power in order to avoid interfering with primary users. In overlay mode dual port antenna is commonly used. One port uses an UWB antenna for sensing and the other port uses a frequency reconfigurable antenna to transmit information over the band where there are holes due to the absence of primary users. Also an UWB antenna which selectively induces frequency notches in the bands where primary users exist can be designed for secondary users to transmit with sufficient power over the unused bands. We design CR antennas over a wide frequency bandwidth of 1- 11 GHz, for use with UMTS, WLAN, WiMAX and UWB applications. CR transceivers involve properly designed antennas, the power amplifiers, the filters/duplexers and ADC/DACs. For wideband operation, with sensing, the dynamic range of signal strengths could be as wide as 100 dB which necessitates appropriate design of ADC/DACs, high linearity of LNAs, and achieving impedance matching over a wide frequency range. To deal with dynamic range, several ADCs are used in parallel to widen the conversion bandwidth. A hybrid filter bank based ADCs can be used but such design is sensitive to analog filter errors and imperfections. Also RF DACs are designed for fully digital RF transmitters. The LNA is designed with negative feedback which uses inductive behavior to cancel the input capacitance and achieves a frequency range of 50 MHz to 11 GHz. The down-conversion harmonic rejection mixer removes odd-order LO harmonics. As part of wideband frequency synthesizer implementation is concerned, multiple oscillators are used over a wide frequency range. For acceptable phase noise figures, the tuning range of LC type oscillators is limited to about +/- 15% at frequencies of tens of GHz. Our clients of CR transceivers include Eishaa Networks, Chennai.

 PLACEMENT COORDINATOR

 PRINCIPAL

bigElogicTechnologies

Design your future with us...

bigElogic technologies is a Chennai based leading solution provider for Windows, Web, Mobile and Electronics based applications. Established in 2006, the company has been promoted by some highly experienced professionals dedicated to provide total IT solutions under one roof. It possesses not only the latest technology gadgets but also the most knowledgeable and experienced hands to offer most user friendly customized solutions. We are a product company focusing on innovating products to help solve real world problems. Our interest spans over and not limited to web, desktop applications, data mining, machine learning, artificial intelligence, Internet of Things, Cloud computing. The technologies we expertise in are ASP.NET, SQL server, MEAN stack, Android, Python, Flask, NLTK, AWS, Tensorflow, Hadoop, MATLAB, Xilinx, Google SDK and so on. Apart from the product development, we are into Research, Consultancy in research and product development, training and placement activities.

Major products

- Content Management System using ASP.NET MVC 4/SQL Server for **Iraq Governor office.**
- XRF Reporting Tool using C# and SQL Server/MS Access Generic Version for **Fischer Measurements India Pvt Ltd (Pune).**
- Job Website Portal using MEAN stack (Mongo DB, Express JS, Angular JS and Node JS) for a leading **pharmaceutical company in US.**

Other products

- Photo Studio Management Studio
- Fire Works Management Studio
- Account Software
- Customized Offline Bulk SMS
- Gold Exchange Management
- XRF Reporting Tool
- Acid Test Maintainer
- Silver Exchange Management
- Account Management Studio
- School Offline Management Studio
- Grocery Shop Management Studio
- Payments API
- AI Chatbot with IoT

We are doing research to build products to solve problems of learning community, society and to revolutionize commercial markets.

- Virtual Teacher – This started as we find students difficult to learn new technologies at their own pace and to assist individually. We are employing neural networks to understand the user, customize content, track progress and uses feedback mechanism.
- Now Connect – This began with the idea of providing information and interacting with people in public or commercial areas to know what's happening around them. Suppose you are in a supermarket and searching for an item, this will help you locating product, information about product, provide feedback. In case of airports, this will let you know of the details and local info updated lively for easy access without relying on the information boards and query instantly.
- Safe Ride – Accidents are catastrophic and we are working on pattern recognition and unlocking to analyze the mental condition of the driver and ensure he is fit to ride mentally which prevents to ride under influence of alcohol, high mental stress, emotional imbalances.
- Cognitive Radio – The design of CR antenna is being carried out, using ANSYS HFSS. CR networks can be implemented using overlay or underlay mode. In underlay mode an ultra-wide band antenna can be used to transmit with very low power in order to avoid interfering with primary users. In overlay mode dual port antenna is commonly used. One port uses an UWB antenna for sensing and the other port uses a frequency reconfigurable antenna to transmit information over the band where there are holes due to the absence of primary users. Also an UWB antenna which selectively induces frequency notches in the bands where primary users exist can be designed for secondary users to transmit with sufficient power over the unused bands. We design CR antennas over a wide frequency bandwidth of 1- 11 GHz, for use with UMTS, WLAN, WiMAX and UWB applications. CR transceivers involve properly designed antennas, the power amplifiers, the filters/duplexers and ADC/DACs. For wideband operation, with sensing, the dynamic range of signal strengths could be as wide as 100 dB which necessitates appropriate design of ADC/DACs, high linearity of LNAs, and achieving impedance matching over a wide frequency range. To deal with dynamic range, several ADCs are used in parallel to widen the conversion bandwidth. A hybrid filter bank based ADCs can be used but such design is sensitive to analog filter errors and imperfections. Also RF DACs are designed for fully digital RF transmitters. The LNA is designed with negative feedback which uses inductive behavior to cancel the input capacitance and achieves a frequency range of 50 MHz to 11 GHz. The down-conversion harmonic rejection mixer removes odd-order LO harmonics. As part of wideband frequency synthesizer implementation is concerned, multiple oscillators are used over a wide frequency range. For acceptable phase noise figures, the tuning range of LC type oscillators is limited to about +/- 15% at frequencies of tens of GHz. Our clients of CR transceivers include Eishaa Networks, Chennai.
